

REBUILDING AUTOS. JUMPSTARTING LIVES.

WE ASKED YOUTH WHAT THEY THOUGHT ABOUT THE C.A.R. VOCATIONAL PROGRAM

AFTER VISITING OUR TABLE AT THE SCYEC OPPORTUNITY FAIR
(OCTOBER 6TH, 2014)

HERE'S A SAMPLING OF WHAT THEY TOLD US ABOUT THE PROGRAM:

"I know it will change my life for the fact that one day I will own my own business."

"Amazing...it can get me a job and prepares me for life."

"I am really interested. It's the best idea to get certified."

"I can't believe this is in our backyard to help me learn a life long skill that'll never die."

"I love it. It's what I always dreamed to do."

"I like it! Fixing cars is a good idea. Everyone drives. Without cars the world would be nothing."

"I like the way it is funded to afford it. They need funding so the circle keeps going. If you give us the chance to do this, it is the perfect opportunity to continue it on by being able to support ourselves and then give back to other people."

"It can change my life and put me on a great path."

"It is wonderful program to get people on their feet. I feel it can change my life."

"It would give me proper tools for life."

"This program's education and way of funding sounds very inspirational. I will forever be driving in a well taken care of car as well as be able to educate myself."

"To build a car from the ground up can change my life."

"I can even save money fixing my own car too."

"The program is a great idea. I would like to get involved. If people asked I would say join!"

"It would let me do what I love...for work."

"It's good for a student to learn more about what they like to do in life. It will give me a career I always wanted as a child."

"I know that the car program will benefit a lot of youth. I love the car program already."

"Fun and exciting idea. It will keep me busy and out of trouble."

"It could open up a lot more doors for me."

"If someone asked, I would tell people to just give it a chance. It will change life."

"Thank you for you and your program idea."
